- It is a condition of the scholarship that a recipient is required to undertake activities that are of use, help or benefit to the scholarship provider - then the student is rendering a service by agreeing to undertake those activities;
- An award is received by a student where the scholarship is not provided principally for educational purposes.
- During or upon completion of the degree for which the scholarship is awarded a recipient is required to become, or shall continue to be, an employee of the funding body; or
