

The applications of drugs in enhancing scaffold-associated healing in the middle ear

Status: **Closed**

Applications open: 1/11/2021

Applications close: 1/06/2022

About this scholarship

Description/Applicant information

This scholarship is part of the newly established alliance between Curtin University, Deakin University and Ear Science Institute Australia (Ear Science). The aim is to support and grow the ongoing collaboration between Curtin, Deakin and Ear Science and engage best students to grow their skills and capabilities and benefit everyone involved. The proposed research is at the forefront of cutting-medical nanotechnologies in the context of hearing loss, focusing on improving the lives of people, mainly children, with chronic middle ear perforation. The funding comes from a successful government ARC-Linkage grant.

Student type

- Future Students

Faculty

- Faculty of Health Sciences

Course type

- Higher Degree by Research

Citizenship

- Australian Citizen
- Australian Permanent Resident
- New Zealand Citizen
